SUBJECT: Helicopter Operations

This memo covers helicopter operations at BUMC Tucson for the month of June. There were 76 medical flights during June, as compared to 112 in May and 100 a year ago.

There were five observed violations of the “no-fly zone” in June. Three of the violations were attributed to high winds by the pilots. One was a pilot new to the area and unfamiliar with the pad. Officers spoke to that pilot and his departure was correct. One of the above mentioned flights resulted in a report from our neighbors.

There were five other reports from our neighbors. In those instances, the officer on the pad observed the flight to be within acceptable limits.

Please pass on to our neighbors that if they have questions or concerns about a specific helicopter flight, they should feel free to contact me through BUMC Security at 694-6533.
